Yr level	Content	Assessment
Prep	This term students will engage in hands-on investigations and respond to questions about the factors that influence movement. Students will have the opportunity to apply and explain knowledge of movement in a familiar situation.	Students will be monitored on their ability to describe the properties and behaviours of familiar objects. They are asked to share and reflect on observations and ask questions about how things move.
Year 1	This term students will explore how everyday materials can be physically changed in a variety of ways according to their properties. They will describe the actions used to physically change materials to make objects for different purposes, understanding that science involves asking questions about and describing changes to objects that are used in their everyday lives.	This term students will describe the effects of physically changing a material to make a boat that floats. Students will make a prediction, participate in a guided investigation and record and share observations.
